Subject: draft prologue / intro piece

Jen,
sorry this is late
please let me know if you might be able to incorporate this small paragraph below,
either as a prologue, or at the end of the introduction.
your decision.

Subject: for your review - draft prologue

Prolog or Epilog

Since the completion of the SETAC Global Pellston Workshop in January 2011, regulatory agencies, non-governmental agencies, researchers, and others have continued to advance the science of pesticide risk assessment for pollinators; and, some of that work was informed in one way or another by the efforts of the SETAC Global Pellston Workshop. This book captures the thoughts and considerations of those who participated in the workshop. Further efforts to advance the science, whether in Europe, North America or elsewhere can be found through the appropriate regulatory authorities of countries around the world, or through other stakeholder groups within those countries.
